1.2.1 Number of Add on /Certificate/Value added programs offered during the last five years

DVV Query

As per the HEI data and documents attached with the Metric the HEI has offered only Advance certificate in clinical research Advance certificate in Pharmacovigilance Advance certificate in Personality development Advance certificate in Medical Coding Advance certificate in Medical writing Advance certificate in Data Management during the last 05 years. The HEI must attach syllabus of each of the claimed courses, highlighting the content that is considered imparting transferable and life skills, with a remark as to how this is imparting transferable and life skills. The principal is to certify that NONE of the Value-Added courses are part of the NORMAL, prescribed Academic curriculum.

DVV Response

Please find below the syllabus of each of the claimed courses, highlighting the content that is considered imparting transferable and life skills, with a remark as to how this is imparting transferable and life skills. The principal is to certify that none of the Value-Added courses are part of the normal, prescribed Academic curriculum

Total no. of participants: 02

Objectives	The objective of the course is to present an introduction to database management systems, with an emphasis on how to organize, maintain and retrieve - efficiently, and effectively - information from a DBMS
Methodology	The course was conducted through online mode. Course completion test was taken at the end and certificates were issued to students got good score
Outcome	Upon successful completion of this course, students should be able to: <ol style="list-style-type: none"> 1. Describe the fundamental elements of relational database management systems 2. Explain the basic concepts of relational data model, entity-relationship model, relational database design, relational algebra and SQL. 3. Design ER-models to represent simple database application scenarios 4. Convert the ER-model to relational tables, populate relational database and formulate SQL queries on data. 5. Improve the database design by normalization. 6. Familiar with basic database storage structures and access techniques: file and page organizations, indexing methods including B tree, and hashing.

Duration:06 weeks(2021-22)

Details of activity:

Date 18-10-2020 to 22-11-2020

Venue: Online

Timing:

Date	18-10-2020	25-10-2020	01-11-2020	08-11-2020	15-11-2020	22-11-2020
Timing	10 am	10 am	10 am	10 am	10 am	10 am

Total no. of participants: 25

Objectives	<ol style="list-style-type: none"> 1. To educate regarding assessment and prevention of adverse drug effects of drug and health product 2. The objective of course to enhance patient care and safety in relation to use of medicine. 3. To promote safe and effective use of drug 4. To gain in-depth knowledge on the best way to collect and report adverse events and safety data and manage the risk associated with and risk to pharmaceutical and nutraceutical products
Methodology	The course was conducted through online mode. Course completion test was taken at the end and certificates were issued to students got good score
Outcome	<p>At the end of course students will able to-</p> <ol style="list-style-type: none"> 1. Understand assessment and prevention of adverse drug effects of drug and health product. 2. Gain knowledge about patient care and safety in relation to use of medicine. 3. Understand safe and effective use of drug 4. Gain in-depth knowledge on the best way to collect and report adverse events and safety data and manage the risk associated with and risk to pharmaceutical and nutraceutical products.

Summary Report of Add on course
Advance certificate in Data Management
 In collaboration with **Ingenious healthcare**
Course Code: DM
Duration: 06 weeks (2021-22)

Details of activity:

Day/Date: 28-11-2020 to 26-12-2020

Venue: Online

Timing:

Date	28-11-2020	29-11-2020	05-12-2020	12-12-2020	19-12-2020	26-12-2020
Time	7 pm	7 pm	7 pm	7 pm	7 pm	7 pm

Total no. of participants: 02

Objectives	The objective of the course is to present an introduction to database management systems, with an emphasis on how to organize, maintain and retrieve - efficiently, and effectively - information from a DBMS
Methodology	The course was conducted through online mode. Course completion test was taken at the end and certificates were issued to students got good score
Outcome	Upon successful completion of this course, students should be able to: <ol style="list-style-type: none"> 1. Describe the fundamental elements of relational database management systems 2. Explain the basic concepts of relational data model, entity-relationship model, relational database design, relational algebra and SQL. 3. Design ER-models to represent simple database application scenarios 4. Convert the ER-model to relational tables, populate relational database and formulate SQL queries on data. 5. Improve the database design by normalization. 6. Familiar with basic database storage structures and access techniques: file and page organizations, indexing methods including B tree, and hashing.
