INDIRA INSTITUTE OF PHARMACY
A Report on "Cloth Bag Distribution"
Date: 31/03/2022

Use of single use plastic is deleterious for the environment. As the plastic is not degradable for years, it becomes very difficult task to dispose off all the plastic that gets generated every day. It is estimated by an NGO from the data received from Central Pollution Board, everyday there is approximately 25,940 tonnes of plastic waste generated in India everyday which itself is a huge quantity. So, many tried to provide solution to this problem which included reducing the single use plastic usage in day today activities. Some drastic steps need to be taken in this regard considering the environmental sustainability and long-term effects plastic has onto the environment.

So, keeping this in mind NSS students of Indira Institute of Pharmacy decided to distribute cloth bags in the adopted village i.e. Patgaon. Students reached to each and every household of the Patgaon village and created awareness about using cloth bag instead of asking for plastic bags from vendors and gave the cloth bags to each and every household. Approximately 340 cloth bags were distributed and the financial support was provided by the honourable chairman of the sanstha, Mr. Ravindraji Mane.
